

The Ohio-Israel Ag & CleanTech Initiative of The Negev Foundation Presents

THE MARCH 2018 WATER PROFESSIONAL DEVELOPMENT MISSION TO ISRAEL

The 2018 Professional Development Mission to Israel is built around site visits of Israeli companies working in a variety of water related fields. During these visits you will have the opportunity to view equipment and processes and speak directly with the people who create and operate these technologies. The goal of this 6-day in-country experience is to offer an economical, comprehensive education of the latest in Israeli water technologies while incorporating some leisure time to take in the sights and culture of Israel. Utilizing local services and leveraging our group size for lower rates, we are proud to offer an economical land package at \$2,500/person that is full of educational value.

This package DOES NOT include airfare, single room supplement, beverages, tips (for guides, hotel staff, etc.), travel insurance, or personal expenses. If you have any questions regarding what our package includes, the mission schedule, details of professional site visits, or any other mission details, please contact us.

TOPICS COVERED

Stormwater Management
